Jake Hart

Software Developer
Greater Chicago Area

Summary

Software Developer specializing in C++ & Python. Experienced with Git and GitHub version controls. Skilled in Linux-based environments. Employed at Nidec Drive Technology since 2022. Enrolled at College of DuPage since 2025. Committed to education and growth within software development and broader computer science. Interested in opportunities involving backend development, database systems, and applications.

Experience

Nidec Drive Technology Corporation

Mechanical Assembler

April 2022 - Present (4 years 7 months)

Glendale Heights, Illinois, United States

I have been solely responsible for all inventory and assembly tasks within the power transmission department since October 2022. I assemble between 50 - 80 industrial gearbox drives per month, ranging anywhere from 10 - 1,000 pounds each. Familiar with hand tools, power tools, air tools, drills, and saws.

- Process for each unit includes picking, assembling, painting, paperwork, inspection, and packaging.

- Parts assembled include flanges / bases, oil seals, shafts, bearings, snap rings, gaskets / bond, couplings, housings, pins, wheels, bushings, keys, collars, covers, fans, cones, discs, oil, cords, and motors.
